

Instructions for Re-scanning Zenith converter boxes

*With converter on, press MENU

*Press \geq button on remote

*Press \geq button again

Converter will now go into scanning mode. You will notice a box on the right hand side of the picture, with channel numbers changing.

When this box disappears after a minute or two, press the EXIT button on remote twice, or enough times to make menu disappear on screen.

That's it. You should now have all of your channels back
